Master's Degree in Economics (MSc Econ)
Special Focus: Internationalization and Economic Policy

Module: Economic Integration (Prof. Welfens)
Date of Exam: 20.09.2012
Duration: 90 minutes
Allowed utilities: none

Of the blocs 1 and 2 all questions have to be answered, of the bloc 3 only two out of five have to be answered. Therefore, each bloc should be answered within 30 minutes.

Simulation Models for Policy Analysis

1. Explain the role of expectations for investment and consumption, respectively; and for modern macroeconomic models. (10 P.)
2. The New Keynesian Macroeconomics (NKM) emphasizes specific frictions in the market economy. Explain key elements of the NKM and discuss the role of these frictions for achieving macroeconomic equilibrium; which economic policy is adequate for overcoming a recession – given the fact that interest rates are very low. (20 P.)

Monetary Integration

1. Explain the key approaches of the Optimum Currency Area literature and explain why a country like Greece is only partially fitting in the set of the criteria discussed. (20 P.)
2. Define monetary integration and explain the economic logic of the convergence criteria for Economic and Monetary Union in the European Union. (10 P.)

Economic Dynamics and Integration in Eastern Europe and Asia

(In this bloc you have to answer only two questions)

1. The Asian countries have shown considerable economic dynamics and it is widely expected that high growth in Asia will continue. What will be the main effects on trade and Foreign Direct Investment for the EU? (15 P.)
2. What are the impacts of the financial crisis on the development of financial markets in Asia? (15 P.)
3. Which effects can be expected from regional economic integration? In this context you should discuss options for optimum exchange rate regimes for the ASEAN countries. (15 P.)
4. Explain reactions to the economic crisis in Eastern Europe. (15 P.)
5. Explain results of the East-West integration in Europe since the 1990s. (15 P.)
